Northwestern State University
Natchitoches, LA

Announcement of Available Position

Position: System Administrator - Lead

Responsibilities: Northwestern State University seeks an individual to serve as a lead System Administrator for the University’s enterprise computing environment. This environment consists of a diverse platform of distributed systems across several campuses. The position is focused on managing a number of Windows, Linux and Mac OS X servers in addition to an OpenVMS implementation supporting the primary administrative and academic systems of the university. The duties include installation, configuration, and maintenance of all critical systems with responsibility for the reliability, availability, and integrity of enterprise computing infrastructure. The position requires wearing a notification device and sharing of 24x7 on-call support.

Qualifications: Bachelor degree preferred with at least five years of related experience in the following concepts or technologies; Windows server, Mac OS X server, Linux web and database servers, VMware, Active Directory and related services, Microsoft Exchange, CommVault Backup solutions, iSCSI and Fiber Channel SANs, Microsoft SQL database management, OpenVMS, LDAP, software distribution, project management and leadership skills. Certification in any related areas is preferred.

Salary: Negotiable, depending on experience and qualifications.

Application Process: Review of applications and interviews of candidates will begin immediately and will continue until the position is filled. Position available contingent upon Board approval and applicants may be subject to a background check and a drug screen. Applicants must submit a letter of application, outlining their qualifications, a current resume, official copies of their college or university transcripts and the name, address, and telephone number of three references to:

Mr. Tracy Brown
Associate Director of Technical Services
Northwestern State University
Office of Information Systems
200 Roy Hall
